REASON FOR TODAY'S CALL:
 -leak under kitchen sink.

DESCRIPTION OF WORK PERFORMED:
 Aug18--The connection between the kitchen faucet spray head and spray hose was loose causing water to leak through the faucet to the underside of the sink. I tightened this connection and tested by filling both sides of the sink and draining. The toilet in the guest bathroom has had a flapper installed that is not meant for this toilet, I will have to order and replace this flapper. The drain stoppers in the lavatory drains in the master bathroom were non functional, I made an adjustment so they can be used. Aug21--purchased and installed 3" Toto flapper.
