REASON FOR TODAY'S CALL:  
 -garburator backing up.

**DESCRIPTION OF WORK PERFORMED:**

The garburator had a couple of beer bottle caps and a long piece of string jammed inside the grinding chamber. I removed everything from the grinding chamber and got it running again but the garburator motor now has a very loud grinding sound when in use. Also the garburator has cracks in the housing that water is seeping out of. I replaced the garburator with a new Badger5 and tested by filling and draining the sink while running the garburator.
