REASON FOR TODAY'S CALL:

"The main pipe under my kitchen sink is leaking, badly. I did try to stop a previous leak with white silicone sealant (not good?) - but it obviously didn't work... While you were here I would also have you look under the bathroom sink for a similar leak I also seemed to have temporarily fixed, and my "squealing" taps when I have a shower (old plumbing or a new washer needed?)."

DESCRIPTION OF WORK PERFORMED:

KITCHEN---Installed customer supplied kitchen faucet. Replaced kitchen sink strainer assembly and re-piped drainage in ABS. BATHROOM---Replaced tub spout. Tested the lavatory sink by filling and draining multiple times with no leaks from drainage. I did notice water leaking out of the hot supply stem, I tightened the packing nut and asked owner to keep an eye on it. Siliconed around base of lavatory faucet.
