**REASON FOR TODAY'S CALL:**

"Bathroom shower and sink recaulking. 3'x3' shower mould growing underneath silicone around shower base, needs replacing."

**DESCRIPTION OF WORK PERFORMED:**

Re-caulked around shower base and lavatory sink. The lavatory sink has rust under the lip, if this rust comes through the new silicone the sink will have to be lifted, cleaned, and re-set with new silicone. The shower door had a water deflector at the bottom of the door that was attached by simply siliconing it in place, this came off quite easily during the removal of the old silicone. I do not have the right screws fir this so I resiliconed it in place.
