REASON FOR TODAY'S CALL:
 -no cold water coming out of fixtures

DESCRIPTION OF WORK PERFORMED:
 Usually if hot water is crossing over into the cold lines in a unit it is originating from the shower valve. I removed the shower valve cover plate and noticed the valve was quite hot, this valve had not been in use since early morning so it is a good sign that water is crossing over through this valve. I replaced the cartridges within the valve and re-installed the trim.
