REASON FOR TODAY'S CALL:
 -shower handle fell off. water won't fully shut off even in fully closed position.

DESCRIPTION OF WORK PERFORMED:
 The shower valve was installed too deep into the wall, the installers compensated for this by installing the handle to the tip of the cartridge. I couldn't get the handle back on fully either. To get the handle to work as best it can I ended up removing a piece of the trim and reinstalling the handle closer to the end of the cartridge stem.

TECHNICIAN RECOMMENDATIONS:
 If this becomes a frequent occurrence the only way to properly install the shower valve would be to open up the wall.
