REASON FOR TODAY'S CALL:

1. Garburetor is leaking and needs to be replaced. 2. Upstairs bathroom off guest bedroom has single handle sink faucet. Apparently it is leaking. Small piece that secures handle to assembly is missing.

DESCRIPTION OF WORK PERFORMED:

Replaced garburator with new Badger5 and tested by filling and draining the sink twice. The upstairs lavatory faucet(bathroom with standup shower) had a loose set screw on the handle and water was leaking out of the aerator threads. I tightened the handle set screw and used Teflon tape to seal the threads of the aerator.
