REASON FOR TODAY'S CALL:
 "Replace Danze diverter and increase shower head flow."

DESCRIPTION OF WORK PERFORMED:
 The shower was tiled in such a way that the diverter cartridge could not be accessed. I drove to Home Depot, purchased a tile bit, and drilled small holes in the tile to allow for removal without the possibility of damage. I removed and replaced the diverter cartridge(customer supplied), and tested. During the installation the shower valve handle dropped in the tub and chipped the floor of the tub to the left of the drain, for this reason I am not charging for the service.

TECHNICIAN RECOMMENDATIONS:
 I'm really sorry to have chipped your tub. The following company was referred to me by someone in the showroom at Emco. The cost of repair was said to be around \$90. (Bathtub Dr: 604.944.0393)
