REASON FOR TODAY'S CALL:

"1) Garburator connection rusted - needs replacement or new garburator. 2) Tub drains slow - suspect hair blockage 3) Some black mold on caulking in shower"

DESCRIPTION OF WORK PERFORMED:

-Removed garburator mounting bracket, cleared out debris, and re-attached. Tested by filling and draining the sink. During testing I noticed the kitchen faucet was missing a washer between the spray head and hose, I found one in my van and installed. -Used PowerSpin drain snake to clear hair from the tub drain. - Recommended trying to clean the mold off of the base of the shower, if it cannot be cleaned the silicone will have to be removed and replaced.
