REASON FOR TODAY'S CALL:
 Backed up sink drain in ensuite and leak in ensuite sink pipe.

DESCRIPTION OF WORK PERFORMED:
 I cleared the lavatory sink drain blockage using the PowerSpin drain snake. During testing I noticed water backing up out of the tub drain, I ran the snake through both the tub drain and the lavatory drain and cleared the blockage. Tested by filling both the lavatory and tub drains and draining them both simultaneously. The leaking under the sink is coming from the faucet, it appears to have a leak in the spout, internally, when in use. I believe the faucet is Supergrif which we can no longer get parts for so replacement will be necessary.
