REASON FOR TODAY'S CALL:

The faucet/tap is leaking onto the counter. Also, underneath the sink (not pictured) my husband said a pipe leaks when you turn the cold water off.

DESCRIPTION OF WORK PERFORMED:

-the faucet was leaking through the top where the handle connects, I replaced the faucet with a new Delta Palo.

TECHNICIAN RECOMMENDATIONS:

The packing nuts on the hot and cold shut off valves under the sink were slightly loose allowing water to seep out, I tightened the packing nuts and there are no leaks present but if water does start to seep out again the valves should be repaired or replaced.
