REASON FOR TODAY'S CALL:

"About 2 months ago I saw a couple of very small stains on the bottom of the sink closet and started watching it. The top part of the pipe below the sink is a bit wet only sometimes not all the times. I tried running water for couple of minutes but there were no water leak. But sometimes I touched the pipe in between using waters and I could see the top part of the pipe is a bit wet. I guess there is a leak although it is almost invisible. I am renting my suit out to a tenant through RIF, one of your customers. I thought I'd better let you check it out"

DESCRIPTION OF WORK PERFORMED:

LAVATORY SINK--the nut that secures the mechanical drain to the sink was slightly loose and water was seeping out, I tightened this nut and tested.
