REASON FOR TODAY'S CALL:

-Bathub, and bathroom sink are draining slowly. -The sink plunger linkage is not connected to the actuator. *concierge will grant access. *call Kirk if any troubles with lavatory drain(206.697.2041)

DESCRIPTION OF WORK PERFORMED:

---I cleaned the tub drain using the PowerSpin drain snake and removed a large clump of hair, tested by filling the tub 8" and draining. ---I re-attached the lav drain mechanical stopper to the lever and tested. ---

TECHNICIAN RECOMMENDATIONS:

There is water leaking out of the handle that controls water flow and temp for the tub. I believe the water is leaking right through the cartridge. It only seems to leak out when the faucet is in the on position, and not consistently, but it should be addressed sooner than later.
