**REASON FOR TODAY'S CALL:**

"Water pressure in kitchen sink very low and suspected leak below kitchen sink or from dishwasher. Wood floor has raised up at seam about a foot to the side of dishwasher."

**DESCRIPTION OF WORK PERFORMED:**

The seal at the bottom right corner of the dishwasher door frame was off and allowed water to seep out during a wash cycle. I reinstalled the gasket but suggested maybe calling an appliance repairman to possibly replace it. The kitchen faucet has fill pressure from under the counter before it connects to the hose, I suggested calling Grohe and having them send out a new spray hose connecting coupling.
