REASON FOR TODAY'S CALL:

"Hi, a suite rented to our tenants experienced water damage on last Thursday. We need a plumbing assessment to provide our insurance company in terms of cause of damage and our insurance company needs a plumbing assessment. It is the dishwasher in the suite that likely caused the water leak. We were recommended someone but they turned out to be an appliance person and not a plumber and didn't do an appropriate assessment. We are anxious to have it done soon as our insurance is determining coverage and are hoping you can help us out. My number is 250-507-2814 (I live in Victoria) and my tenant's is 778-708-6939.

DESCRIPTION OF WORK PERFORMED:

When I arrived onsite the dishwasher supply line had already been removed by a handyman on a previous visit, there was a new braided supply left onsite for me to connect. I connected the supply line, turned the supply valve on, and ran the machine through a cycle. Shortly after the machine started filling I could see water pouring out of the pump located under the center of the machine(pictures sent to home owner) I turned the machine off, turned the supply valve off, disconnected the supply hose, and soaked up the water under the machine.
