REASON FOR TODAY'S CALL:

-both ensuite bathroom lavatory sinks not draining well. -check other lav sink. -tub faucet loose.

DESCRIPTION OF WORK PERFORMED:

---Guest Bathroom: -The toilet was blocked, I cleared the blockage using our 6' toilet auger and tested by flushing large rolled up balls of toilet paper. During testing I noticed the fillvalve and flapper were not functioning properly, I replaced the fillvalve, flapper, and supply line. -Tub is draining well. -I raised the height of the lavatory drain stopper and is now draining well. ---MASTER BATHROOM: The hot handle on the roman tub filler has a broken connector piece, the faucet still turns on but is loose. I will inquire with Grohe about replacement parts. -I raised the height of the lav drain stoppers and both sinks are draining well. -Shower and tub drains are also draining well.
