REASON FOR TODAY'S CALL:

1. Shower and bathtub drains in master bath draining slowly 2. Toilet in master bathroom has issues flushing (believe has been serviced previously) 3. When filling bathtub in 2nd bathroom cannot turn shower off completely

DESCRIPTION OF WORK PERFORMED:

MASTER: I used the PowerSpin drain snake to clear hair for the tub/shower drain. I replaced the flapper in the toilet. The tank is angled causing the fillvalve to angle towards the front of the tank which interferes with the tank lever. The flush is much better with the new flapper but the lever does have to be held down for a second before releasing. GUEST: The tub/shower diverter was pushed down half way causing water to flow up through the shower when filling the tub. When the diverter is all the way up it functions as normal.
