REASON FOR TODAY'S CALL:  
 -lavatory faucet leaking.

DESCRIPTION OF WORK PERFORMED:

---APRIL30: The cartridge within the lavatory faucet was cracked, I replaced this cartridge. During testing the aerator blew apart. I replaced the aerator and then noticed that there seems to be hot water coming out of the cold lines in all faucets. Eva contacted the building manager to let him know about the hot water issue and ask for the location of the main water shut off valve but he was unavailable until the following day. ---March4: Eva spoke with the building manager and he mentioned that some plumbing work was being done in the building that would have caused the issue with hot water coming out of the cold lines, this issue has now been resolved.
