REASON FOR TODAY'S CALL:

-lift toilet and replace wax seal. *Also, look at the tap in the bathroom too, as it has become very stiff and now rotates on the sink apron just from using the lever to control the water temp. Probably some water line silt has made it to the mechanism and needs to be cleaned.

DESCRIPTION OF WORK PERFORMED:

-Lifted toilet and re-set with new wax seal. Siliconed around the entire base of the toilet and used putty to fill the gap between the bolts and the toilet. -The lavatory faucet cartridge is very stiff, unfortunately we cannot get replacement cartridges for this faucet and replacement of the entire faucet would be necessary if it becomes worse.
