REASON FOR TODAY'S CALL:

I need an appt asap - i can accommodate a Thursday appointment if possible (i am unavailable 10-2) - call me if u can do that 778-927-4217. Otherwise I can accommodate Friday. I had u in in February to replace the tub thingy after the unit below said there was water coming into his shower from above. No apparent issues. But on May 13, 10pm, he said the water is now pouring into his suite. I did notice my tub wasn't draining fast this morning. So I cut my shower short and left for my day. Tonight, i flushed it with warm water just before 10 to see what was going on. Not even that much water because the tub was draining super slow... and then neighbour below knocked saying water was pouring. So he doesn't want me to use my shower at all, he thinks its that bad.

DESCRIPTION OF WORK PERFORMED:

-I removed the shower valve trim and used a flexible camera to visually inspect the drain fittings under the tub. I ran the tub and the shower for a good 20 minutes while inspecting each connection carefully. I did not see any moisture and the insulation around the drain where it penetrates the floor to the ceiling below is also dry. -The drain was running a little slow, I used the PowerSpin drain snake to clean the drain. I removed a small amount of hair.

QTY.	CODE	DESCRIPTION	UNIT PRICE	PRICE
1		Clean drain using PowerSpin / Tub/Shower	\$139.00	\$139.00
