REASON FOR TODAY'S CALL:

"The dual kitchen sink has a garbage disposal(Badger5) in the left sink. The dishwasher also connects to the plumbing under the left sink. This garbage disposal no longer works and the drainage in the left sink is very slow. This leads to the left sink backing up with water whenever the dishwasher runs or if we let the water run into the left sink." On the other hand the right sink drains perfectly.

DESCRIPTION OF WORK PERFORMED:

I removed a small piece of plastic from the grinding chamber and flipped the breaker to the on position. Tested by filling and draining the sink while running the garburator.
