**REASON FOR TODAY'S CALL:**

"My garburator does not work and the kitchen sink is plugged up because of it I believe. Also the bathroom sink does not drain properly."

**DESCRIPTION OF WORK PERFORMED:**

-I unjammed the garburator and re-set the breaker. I didn't find anything out of the ordinary in the grinding chamber it just seemed to have seized up due to rust buildup. I tested by filling and draining the sink while running the garburator. -The lavatory sink was slow to drain. I removed hair from just under the stopper and tested by filling and draining.
