REASON FOR TODAY'S CALL:  
 "The flapper on my toilet is not sealing correctly so the water leaks through the flapper hole, water level drops and then refills every 2-5 minutes. The model is American Standard, Cadet 3, concealed trapway."

DESCRIPTION OF WORK PERFORMED:  
 The flapper gasket had a large bubble form in it which compromised the seal and allowed water to trickle out of the tank to the bowl. I replaced the flapper with a new 3" Fluidmaster and tested.
