REASON FOR TODAY'S CALL:
Garburator sounds like a dying car that won't start.

DESCRIPTION OF WORK PERFORMED:
I unjammed the garburator and tested by filing and draining the sink. I did not find anything out of the ordinary inside the grinding chamber, it seemed to have seized up due to a buildup of rust.

TECHNICIAN RECOMMENDATIONS:
I suggested running the garburator every week or so with cold water to keep it moving and help prevent rust from building up to the point where it seizing up again.
