REASON FOR TODAY'S CALL:
 There is a small leak under my kitchen sink, when I run water.

DESCRIPTION OF WORK PERFORMED:
 I tested the kitchen sink and faucet by filling both sides of the sink and draining, running the garburator while it drained. I did notice a small droplet of water forming at a connection on the faucet spray hose under the sink, I tightened this connection and tested again. I noticed moisture was leaking through the lip of the kitchen sink where it meets the countertop. I suggested that Tanya let this area completely dry out and then seal with clear silicone.
