REASON FOR TODAY'S CALL:

1. Toilet is running 2. Crack in garbage disposal (see attached pic) 3. Kitchen sink tap drips and has low water pressure (I have had this checked in the past and was advised tap not leaking and not able to fix water pressure however would like you to double check as it was last checked a few years ago when I lived there).

DESCRIPTION OF WORK PERFORMED:

-I replaced the garburator with new and tested by filling the sink and draining while running the garburator. -I tested the kitchen faucet and was able to increase the pressure but to stop the periodic dripping from the handle the cartridge will have to be replaced(I spoke with Rebecca and will be emailing her a replacement option). - I replaced the toilet fillvalve, flapper, and supply line and tested.
