REASON FOR TODAY'S CALL:
"I wanted to inform you that the toilets in both bathrooms for our apartment have started not flushing correctly - over the span of a few weeks they slowly started being in a constant state of "tank filling" - and now one of the toilets no longer works at all, and the other constantly "leaks" (self contained, no water leaves the toilet)."

DESCRIPTION OF WORK PERFORMED:
The flushvalve gaskets in both toilets were warped. I replaced the flush valve gaskets in both toilets and tested.
