REASON FOR TODAY'S CALL:
 -leak detected in unit below. Beloved to be coming from the tub.

DESCRIPTION OF WORK PERFORMED:
 -I removed the shower valve trim and used our flexible camera to inspect under the tub but could not get a good look at what could be causing the leak. I cut a 7" x 7" hole in the wall behind the tub drain and could see a lot of moisture on either side that looks like it is coming from the wall that separates the bathroom and living room. I ran the shower with no signs of leaking and then filled and drained the tub but there was no leaking from the drain or shower valve. I believe water is leaking through the tiled lip of the tub between the bathroom and living room.
