REASON FOR TODAY'S CALL:

I recently got my downstairs toilet fixed and it now seems to be very low flow, it sometimes takes up to several flushes.

DESCRIPTION OF WORK PERFORMED:

The water level in the tank was set slightly lower than the upstairs toilet, I raised the water level to the same height as the upstairs toilet but the toilet still doesn't have as strong of a flush. Unfortunately I cannot raise the water level any higher and nothing else seems to be wrong with the toilet.
