REASON FOR TODAY'S CALL:

-kitchen sink facet will slowly leak water on to the sink shelf when it is used it looks like it comes out from around the handle. -bathroom sink faucet is also loose and moves around as the water is turned off/on and also has a similar issue where it occasionally leaks. -clean tub drain

DESCRIPTION OF WORK PERFORMED:

-I replaced the cartridges in the kitchen and lavatory faucets. -I tightened the nuts securing the lavatory faucet to the countertop. -I used the PowerSpin drain snake to clear hair from the tub drain and tested by filling the tub 8" and draining.

TECHNICIAN RECOMMENDATIONS:

The shut off valves under the kitchen sink are not fully shutting the water off. I suggest replacing/repairing these valves.
