REASON FOR TODAY'S CALL:
 The flapper on our older Crane toilet is starting to disintegrate and none of the generic replacement flappers seem to work. We need help!

DESCRIPTION OF WORK PERFORMED:
 I removed the toilet tank, replaced the FlushValve assembly, and re-installed the tank with a new tank to bowl gasket, tank bolts, and supply line.

TECHNICIAN RECOMMENDATIONS:
 When I removed the tank I noticed a small hairline crack in the bottom of the tank at the right tank bolt hole. This hairline crack likely has been there for years and is not leaking but if water does start to seep out the toilet will have to be replaced as replacement tanks for this toilet are no longer available.
