REASON FOR TODAY'S CALL:
Water in toilets (2) keeps running

DESCRIPTION OF WORK PERFORMED:

---Powder Room: The Villroy & Boch toilet FlushValve gasket had bubbles in it, and the FlushValve assembly is missing one of the clips that secure it into place. I replaced the FlushValve gasket and tested. There is still a dripping sound that slowly dissipates after each flush and eventually stops. I believe this dripping is just residual water making its way through the toilet flange mount. ---Master Bathroom: I replaced the Geberit FlushValve gasket and cleaned the fillvalve diaphragm. I also cleared the lavatory sink in this bathroom (no PowerSpin required). ---Basement Toilet: this toilet has a touch flush that is not functioning, I will have to contact Kohler tech support and find possible solutions.

QTY.	CODE	DESCRIPTION	UNIT PRICE	PRICE
1		Replace Flush-Valve Gasket - Geberit In-Wall	\$149.00	\$149.00
1		Replace Flush-valve Gasket - Standard -ADD-ON	\$50.00	\$50.00
