REASON FOR TODAY'S CALL:
Garburator is leaking and the toilet won't stop running.

DESCRIPTION OF WORK PERFORMED:
-The garburator mounting bracket was loose allowing water to leak through to the underside of the sink. I tightened the mounting bracket and tested by filling and draining the sink while running the garburator. -The toilet fillvalve was not fully shutting the water off when the tank was full, I replaced the fillvalve & supply line and tested.
