REASON FOR TODAY'S CALL:  
 Water not coming into dishwasher. Have checked to ensure water is turned on, sink has water but it is not going into dishwasher.

DESCRIPTION OF WORK PERFORMED:  
 -I disconnected the dishwasher water supply and found that the water was getting to the machine but there is an issue with the machine itself. An appliance repairman will have to be called in to make the necessary repairs. -The existing water supply was connected using a plastic BOW nut on the end of pex piping, I updated the water supply by installing a pex x 3/8" compression fitting and new braided stillness supply.
