REASON FOR TODAY'S CALL:

My sink bathroom faucet has a leak. When I turn the water on full it sprays out from the seal at the end of my faucet. I have attached a picture with me pointing at where it sprays out from. This is the main issue I need fixed. If possible I'd also like to fix the plug in my bathroom sink because it drains very slow. I wonder if I can get a new one or fix how this one works. The old one I had I had to get rid of because when I was cleaning it the separate plastic attachment fell down the drain. I also can't retrieve the plastic piece that fell because of how under the sink was designed.

DESCRIPTION OF WORK PERFORMED:

-I used the PowerSpin drain snake to clean the lavatory drain, unfortunately the plastic piece of the old drain stopper was not in the ptrap and had washed through the drain. -The drain stopper is slowing the flow of water through the drain but cannot be set any higher or it will lose the ability to hold water. -I added Teflon tape to the threads under the aerator which stopped the faucet from spraying out to the side when in use.

QTY.	CODE	DESCRIPTION	UNIT PRICE	PRICE
1		Clean drain using PowerSpin / Lavatory	\$139.00	\$139.00
			SUBTOTAL:	\$139.00
			GST (5%):	\$6.95
			TOTAL:	\$145.95
