REASON FOR TODAY'S CALL:

The toilet won't stop running/filling. It flushes fine, but then it fills up most of the way and never stops filling. It looks like there is a crack in the column nearest the middle, I think it's called the overflow tube. I've turned the water off for now and we use the other one.

DESCRIPTION OF WORK PERFORMED:

I removed the toilet tank, replaced the flushvalve assembly, tank bolts, tank to bowl gasket, fillvalve, and re-installed the tank with a new supply line. Tested and in good working order.
