REASON FOR TODAY'S CALL:
Leak coming from area by washer dryer.

DESCRIPTION OF WORK PERFORMED:
The tenant mentioned while onsite that the restoration company had determined that the moisture was accumulating around the cast iron drain stack and that they would have to contact the plumber that deals with the building to take care of it. I visually inspected the area and could see that the drain stack was covered in rust staining and moisture was collecting around the base. I did not see any sign of moisture coming from the water supply or drain piping coming to or from the laundry machine.
