REASON FOR TODAY'S CALL:
Garburator leaking Buz#Copeland

DESCRIPTION OF WORK PERFORMED:

-The garburator was leaking through the bottom of the unit. I replaced the garburator with new and tested by filling and draining the sink while running the garburator. -The kitchen faucet was reported to be leaking as well. I noticed a leak from the connection between the spray head and spray hose, I replaced the washer which stopped this leak. If the faucet continues to leak from another spot it is recommended it be replaced as it is the original to the building. -The lavatory faucet was reported to be loose, I tightened the nut that secures it to the sink.
