REASON FOR TODAY'S CALL:
 floor showing signs of water damage around kitchen island.

DESCRIPTION OF WORK PERFORMED:
 The leak was coming from the connection between the kitchen faucet spray head and spray hose. This leak was running down the spray hose and directly to the concrete below the cabinet. I tightened this connection, moved the spray hose to the inside of the cabinet, and tested the sink by filling and draining it while running the garburator. I also tested the dishwasher by running it through a short cycle. There are no other leaks present.
