REASON FOR TODAY'S CALL:
Loose kitchen faucet

DESCRIPTION OF WORK PERFORMED:
The brass threads attached to the faucet that are used to secure the faucet to the countertop broke off. I replaced the faucet with a new Delta Palo & tested.

TECHNICIAN RECOMMENDATIONS:
The shut off valves under the kitchen sink are not fully shutting the water off. I had a Tupperware container collecting the drips of water leaking through the valves while making the faucet replacement. ***These valves should be repaired***The main water shut off valves will have to be located to do this. I tried to contact Karl(building manager) 604.688.0070, but he was unavailable until Friday the 8th.
