REASON FOR TODAY'S CALL:

"It plugs ALL the time - I think that it's the plumbing in the floor. It will stop flushing at times, even before the paper goes down!!! And because of medication, I never have BM's big enough to plug it...but something the size of a marble will do it!! "

DESCRIPTION OF WORK PERFORMED:

-I ran the 6' toilet auger through the toilet and did not seem to hit any obstruction. I flushed large rolled up balls of toilet paper and the toilet did not back up. I did notice that the push buttons used to flush the toilet were not secure to the tank lid, they were moving around. I believe what was happening was the buttons would, on occasion, not fully activate the flush which would cause less water than was needed to enter the bowl and only partially flush the bowls contents. I secured the push buttons to the tank lid and continued to test. Toilet see,s to be in good working order. - I also tightened the toilet seat as it was moving around a lot.
