REASON FOR TODAY'S CALL:  
 -garburator leaking. -toilet moves side to side.

DESCRIPTION OF WORK PERFORMED:  
 -The garburator was leaking right through the bottom. I replaced the garburator with a new Badger5 and tested by filling and draining the sink while running the garburator. During testing I noticed that the kitchen faucet is leaking internally and will have to be replaced. -The toilet bolts are as tight as they can go and toilet still wobbles. I believe the flange is likely cracked and will require repair. To repair the flange the toilet will have to be lifted, the flange repaired, and then the toilet re-set with a new wax seal.

TECHNICIAN RECOMMENDATIONS:  
 \*Kitchen faucet requires replacement. \*Toilet flange will have to be repaired.
