REASON FOR TODAY'S CALL:

I have 4 issues. 1: Bathroom sink is extremely plugged up. I have already tried Drains twice; it just keeps getting worse. 2: Kitchen faucet has a big leak. 3: Tub stopper does not function. 4: shower/tub valve switch does not function.

DESCRIPTION OF WORK PERFORMED:

-I tried to repair the existing tub/shower diverter spout but could not. I believe it is missing parts. I replaced the spout with a new Delta pull-down diverter spout. -I used the PowerSpin drain snake to clean the lavatory drain and tested by filling and draining the sink multiple times. -I re-assembled the tub stopper and tested functionality of the lift rod. -The kitchen faucet is leaking from the cartridge as well as the head. Given the age of the faucet I suggested that instead of spending money on repairs it might be a better idea to put that money towards a new faucet.
