REASON FOR TODAY'S CALL:
Kitchen sink leaking.

DESCRIPTION OF WORK PERFORMED:
The leak was coming from the kitchen faucet. The connection between the spray head and spray hose had come loose, allowing water to leak out when in use and find its way through the faucet to the cabinet below. I tightened this connection and tested.

TECHNICIAN RECOMMENDATIONS:
There does not appear to be any water damage to the Harwood flooring directly behind the cabinet but the cabinet was wet. I removed the small amount of water with a rag and informed the tenant to leave the cabinet doors open and allow the residual moisture to air out.
