REASON FOR TODAY'S CALL:
 The kitchen faucet has incrementally been decreasing in volume and pressure. I contacted the building and there are no water pressure issues reported. It has been going on for about two weeks so far and isn't getting better

DESCRIPTION OF WORK PERFORMED:
 I repaired the Hot & Cold shut off valves under the kitchen faucet by replacing the washers, stems, packing, packing nuts, and handles. I removed debris from the kitchen faucet spray hose coupling and tested.
