REASON FOR TODAY'S CALL:

From my tenant: Yesterday afternoon my kitchen drain decided to back up on me, I used a plunger to try and clear it to no avail and finally resorted to unscrewing the trap under the sink to try and clear the problem. I had no difficulty disassembling the trap, but was unable to find the blockage, so I still have an issue. To compound the problem, it appears that someone has tried to do this before and cracked the thread base off the vertical pipe, so there is no way to reset this and secure it back to the drain pipe.

DESCRIPTION OF WORK PERFORMED:

I re-piped the kitchen sink ABS drainage and cleared the blockage using the PowerSpin drain snake. Tested by filling and draining both sides of the sink multiple times while running the garburator.
