REASON FOR TODAY'S CALL:

-replace faucet with spigot for water filter (see photo). Current faucet works however the spigot doesn't. -faucet in bathroom has a slow drip (see photo).

DESCRIPTION OF WORK PERFORMED:

-I installed a new filtered water tap and tested. -The hot shut off valve for the guest bathroom lav faucet was not fully shutting the water off, I repaired this valve by replacing the washer, stem, packing, packing nut, and handle. I replaced the cartridge in the guest bathroom lavatory faucet but found during testing that the dripping continued. I will have to contact Grohe to find out what they suggest could be the reason for this.
