REASON FOR TODAY'S CALL:
Leaking tub faucet.

DESCRIPTION OF WORK PERFORMED:
The shower cartridge failed and was not shutting the water off, allowing hot water to continually flow through the tub spout. While removing the cartridge one of the integral shut off valves failed. I found the main water shut off valves in the storage closet, turned the water off, and repaired the integral shut off valves by replacing the washers, stems, packing, and packing nuts. I then installed the new Delta shower cartridge and tested.
