REASON FOR TODAY'S CALL:
The bathroom flush doesn't stop filling up.

DESCRIPTION OF WORK PERFORMED:
The FillValve would not shut off even when the float was raised all the way. I removed the FillValve diaphragm and found a few tiny pebble stuck inside. I removed these pebbles, re-installed the FillValve diaphragm, and tested by flushing multiple times.

TECHNICIAN RECOMMENDATIONS:
Unfortunately I cannot guarantee that more debris won't find its way through the main water supply into the FillValve and get stuck in the same way.
