**REASON FOR TODAY'S CALL:**

Master Bathroom: -toilet doesn't flush properly anymore; it seems to trickle water after being flushed. -bathtub faucet is permanently dripping water.

**DESCRIPTION OF WORK PERFORMED:**

-The integral stops on the shower valve were starting to break down, I repaired these by replacing the washers, stems, packing, and packing nuts. I then installed a new Tempres ii cartridge and tested before re-installing the valve trim and handle. -The toilet flapper was deteriorating, allowing water to trickle through from the tank to the bowl. I replaced this flapper and tested.
